NIZOM Nasullayev

Full-Stack Developer

About Me

I am a Full-stack developer. I have xperienced with many programming languages such as HTML/CSS, JavaScript, Redux, Python (fastAPI, JWT), Sql/PostgreSql, React, TypeScript, Node.js, and Firebase. I work across the whole stack — designing systems, building APIs, and crafting UIs that feel great to use. I enjoy turning ideas into real products with great user experience.

Skills:

Html & CSS	90%
JavaScript	85%
Node.js	78%
Python	87%
FastAPI & JWT	80%
React + Vite TSX	92%
PostgreSQL	83%

Education:

Bachelor degree 3rd
Asia International University
Bukhara, Uzbekistan

Language:

Uzbek 91%

English 75%

Professional Experience:

Junior Full-Stack Developer

September 2023 - Present
A student at Asia International University

- Built a learning game website which is entertainment to learn subjects and interesting to find quiz questions
- Developed the backend of a project that is called “Latin Language and Medical Terminology” using FastAPI and Python. The system includes Google OAuth authentication via Firebase for users and email/password authentication for admins with role-based access control. Data is stored in PostgreSQL (Supabase) with SQLAlchemy ORM and Alembic migrations. The app features a topic-section-entry structure for medical Latin terminology, progress tracking, randomized quizzes, a 50-question final test, and automatic certificate generation using Pillow with QR code verification. Images are uploaded via Cloudinary.
